

REMARKS

The Examiner in the last action noted that the Correlation Services were not limited by the claim language regarding any specific mechanics and so concluded the breath of the claim language allowed for the rejection in light of Bauer and Feridun. This has been corrected with language now taken from the description (with numbers in the drawings shown for convenience in understanding).

Submitted herewith is a REPLACEMENT SHEET for Fig. 1 which shows it to be prior art as stated in the description.

The RCE was filed without this amendment but the applicant requested and paid for a 3 month suspension of PTO action. The Notice of improper RCE is included and a one-month further extension of time has been paid to complete the RCE.

The Examiner is request to reconsider this application and new claims.

As the application is believed to be ready for issuance, as these further changes should result in an allowance notice which is now respectfully requested.

Respectfully Submitted,

For the Inventor(s):

/Lynn L. Augspurger/
